

# Login | Sign up

Logins are used by websites, mobile applications. They are a security measure designed to prevent unauthorized access to confidential data.

# Main Page

A main page is the primary web page that a visitor will view when they navigate to a website via a search engine, and it may also function as a landing page to attract visitors.

# Menu

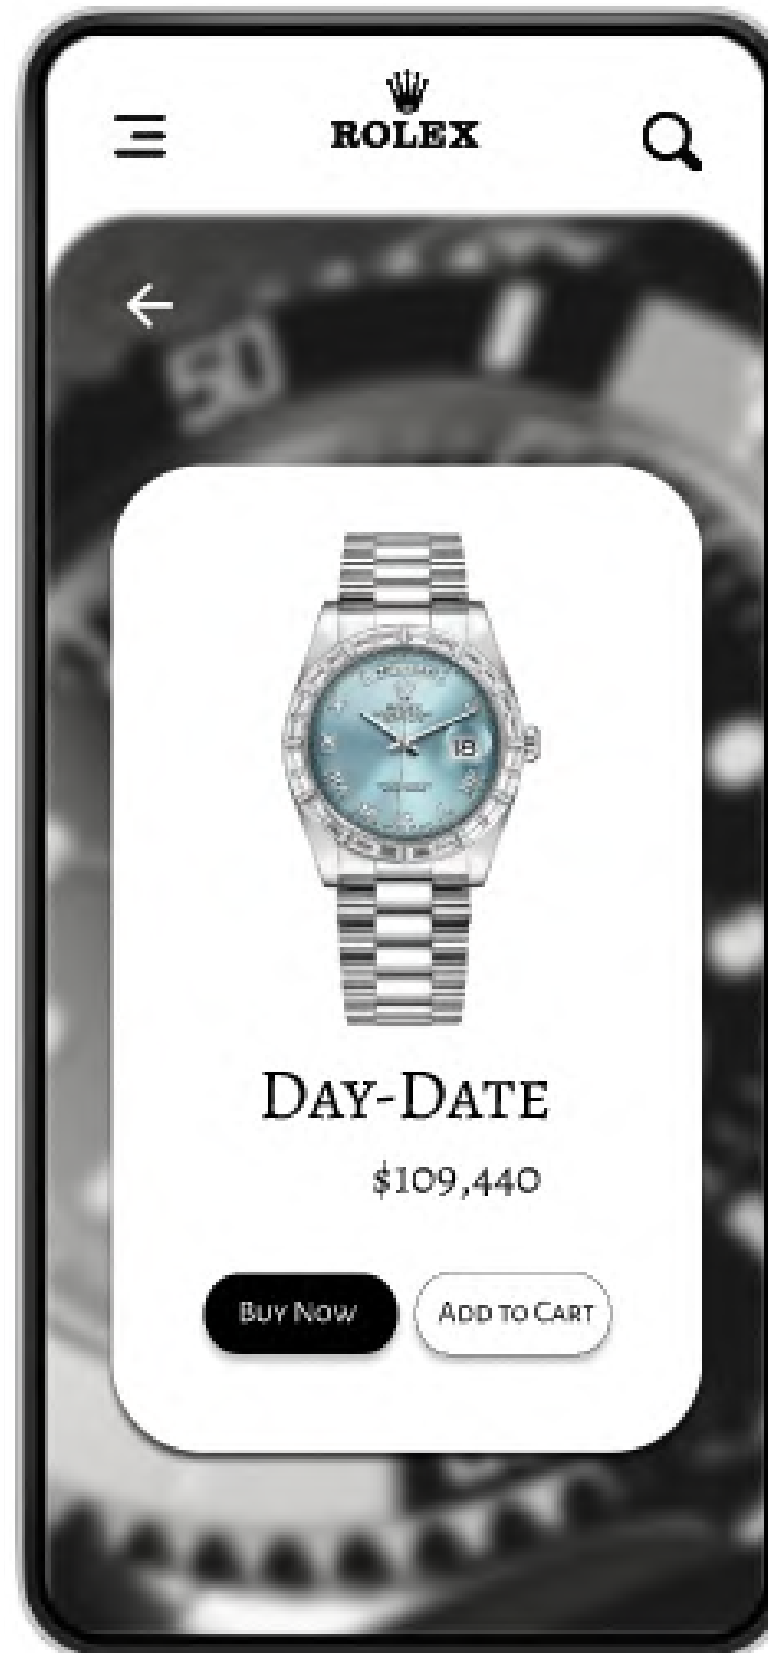

Menus are a common user interface component in many types of applications. To provide a familiar and consistent user experience, you should use the Menu APIs to present user actions and other options in your activities.

# Search

Search enables users to find content by searching for particular words without understanding or exploring the entire application

# Product Screen

Product screens are where users make key conversion decisions, such as add to basket or add to basket or add to wishlist.

Effective product page use a powerful combination of text and images to show essential information about a product, its price, rating, etc.
